Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

NOTE: This is a 'working draft' sequence. It currently consists of 4 contigs. The true order of the pieces is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.

New mammalian histamine H4 receptor proteins and polynucleotides encoding the proteins, useful in gene therapy for treating diseases where it is beneficial to elevate mammalian histamine H4 receptor activity.

Claim 4; Fig 5A; 92pp; English.

The present sequence is that of a cDNA clone encoding a murine histamine receptor of the H4 subtype. The CDNA was isolated from a mouse spleen cDNA library. It shows 72.8% homology to the human H4 receptor coding region. The invention provides mammalian (human, mouse, rat and gininea pig) histamine H4 receptor nucleic acid molecules (see AAI70980-83) and polypeptides (see AAM50564-67). The nucleic acids have been expressed in recombinant host cells that produce active recombinant protein. The pharmacology of known histamine ligands is demonstrated. Mammalian histamine H4 receptor may be used in gene therapy for the treatment of

The present sequence is that of a cDNA clone encoding a rat histamine receptor of the H4 subtype. The cDNA was isolated from a rat spleen cDNA library. It shows 72.5% homology to the human H4 receptor coding region. The invention provides mammalian (human, mouse, rat and guinea pig) histamine H4 receptor nucleic acid molecules (see AAM170880-83) and polypeptides (see AAM5054-67). The nucleic acids have been expressed in recombinant host cells that produce active recombinant protein. The pharmacology of known histamine ligands is demonstrated. Mammalian histamine H4 receptor may be used in gene therapy for the treatment of diseases where it is beneficial to elevate mammalian histamine H4 receptor activity. Recombinant protein is useful for identifying modulators of the mammalian histamine H4 receptor. Such modulators may be useful for diagnosing, treating or preventing asthma, allergy, inflammation, cardiovascular and cerebrovascular disorders, non-insulin 1.8 TGGTACAGCATTGCCTTCTGGCTGCAATGGTTCAATTCGTTTAATCCTTTCTGTAC CCTTTGTGTCACAGGCGTTTCCAGAAGGCTTTCTGGGAAGATACTTTGTGTGACAAAGCAA 901 AGGAAGCTAGCCAGGTCACTGGCCATCCTTCTGAGCGCTTTTGCCATTTGCTGGGCTCCA TGGTACAGCATTGCCTTCTGGCTGCAATGGTTCAATTCGTTTGTTAATCCCTTTCTGTAC New mammalian histamine H4 receptor proteins and polynucleotides eno the proteins, useful in gene therapy for treating diseases where it beneficial to elevate mammalian histamine H4 receptor activity.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                2
                                                                                                                                                                                                                                                                                                                               The present invention describes transmembrane receptors, preferably human grotein coupled receptors (GPCR), for which the endogenous ligand is unknown (orphan GPCR receptors). More specifically the present invention relates to non-endogenous, constitutively activated versions of a human GPCR. These non-endogenous human GPCRs can be useful for the direct identification of candidate compounds as receptors agonists, inverse agonists or partial agonists for use as pharmaccutical agents. AAA46017 to AAA46126 and AAB02825 to AAB02859 represent sequences used in the exemplification of the present invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                240
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            180
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            360
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             480
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      180

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 The present sequence is a cDNA encoding hRUP7, an endogenous human orphan G protein-coupled receptor (GPCR). The full length hRUP7 cDNA was cloned by RT-PCR using human peripheral leucocyte cDNA as template. The orphan GPCR of the invention, like all GPCRs has seven transmembrane alpha helices with an extracellular N-terminus and an intracellular C-terminus. However, no endogenous ligands has yet been identified for the proteins of the invention. The orphan GPCRs may be used in the identification of their endogenous ligands, and to screen potential GPCR agonists and antagonists for use as pharmaceutical agents. The proteins may also be used in the study of GPCR-mediated signalling cascades, and to elucidate their precise role in normal and diseased human conditions. Nucleic acid encoding human orphan GPCRs may be used for tissue localisation enalysis to provide information about their function in
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Novel human orphan G protein-coupled receptors and the encoding cDNAs for use in the identification of G protein-coupled receptor agonists.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               120

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          This cDNA of NCIMB 41073 encodes a human G-protein coupled receptor (GPCR)-like polypeptide, designated PFI-013. The PFI-013 protein can be expressed by standard recombinant methodology. Antibodies and modulators of PFI-013 are useful in the manufacture of a medicament for treating allergic disorder, including extrinsic asthma, immunological disorders, such as intrinsic asthma, vasculitic granulomatous disease, interstitial and other pulmonary disease, including chronic obstructive pulmonary disease (COPD), infectious, inflammatory disease, such as inflammatory bowel disease and neoplastic and myeloproliferative diseases. They are also useful for treating obesity, diabetes, metabolic, neurological medicine, inflammation, cancer, tissue repair, dermatology, photoageing, skin pigmentation, cancer, tissue repair, dermatology, photoageing, skin pigmentation, cancer, cardiovascular, gastrointestinal
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   diseases, allergy and respiratory disease, sensory organ disorders, sleep disorders and hair loss. The PFT-013 protein and nucleic acid are useful in the diagnosis and treatment of the above conditions and also for screening drug candidates for the treatment of diseases associated with signal transduction. The antibodies are also useful for enrichment of eosinophils from mammalian, especially human blood and for detecting the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          180

"Human AXOR35"

Novel G-protein coupled receptor polypeptide and polynucleotide for treating cancer, autoimmune, pulmonary, cardiovascular and neurological disorders and for identifying modulators useful for treating asthma. ij Fitzgerald LR, Graybill TL, Zhu Y; Michalovich D, Morrow DM, WPI; 2001-316464/33 P-PSDB; AAB73622

Claim 2; Page 49-50; 54pp; English

pectoris; myocardial infarction; stroke, ulcers; migraine; vomiting, psychotic and neurological disorders such as anxiety, schizophrenia, manic depression, depression, delirium, dementia, and severe mental retardation, and dyskinesias, such as parkinson's disease, Huntington's disease or Gilles de la Tourette's syndrome. AXOR35 proteins and nucleotides are useful as vaccines, and AXOR35 proteins, nucleotides and antibodies may be used in screening compounds for their ability to modulate AXOR35 activity or expression. Such AXOR35 modulators are particularly useful for treating asthma, and inhibiting or promoting the function of lymphocytes, macrophages, eosinophils or neutrophils in asthmatic lung. AXOR35 proteins, nucleotides and antibodies are also useful for diagnosing or determining susceptibility of an individual to a disease via the detection of abnormal levels of protein or mRNA, or via the detection of mutations in the corresponding gene. AXOR35 proteins are The invention relates to the human G protein-coupled receptor AXOR35 (AAB73621), to CDNA encoding AXOR35 (AAB74006), and to AXOR35 fragments and variants. Like all G protein-coupled receptors, AXOR35 has 7 putative transmembrane domains and is involved in signal transduction. AXOR35 has homology and structural similarity with G protein-coupled receptors such as the human histamine H3 receptor. The invention also relates to expression vectors and host cells comprising AXOR35 DNA, to recombinant expression of AXOR35, and to an AXOR35-specific antibody. AXOR35 proteins and nucleotides may be used to treat a wide variety of disorders including bacterial, fungal, protozoal and viral infections, particularly HIV-1 or HIV-2 infections; pain; cancers; benign prostatic hypertrophy; diabetes; obesity; anorexia, builmia; osteoporosis; asthma; allergies; urinary retention; acute heart failure; hypotension; hypertension; angina

also useful for inducing an immunological response in a mammal against the above diseases, and for antibody production. AXOR35 nuclectides are also useful as diagnostic reagents, in chronosome localisation and tissue expression studies, and for producing transgenic animals useful in drug discovery. AXOR35-specific antibodies are useful for purifying the AXOR35 protein or fragments thereof, and are also useful for treating conditions sescoiated with the expression of the AXOR35 protein. The present sequence represents cDNA encoding human AXOR35 180 240 300 840 120 120 180 240 300 360 360 420 420 480 476 540 534 009 594 099 654 720 714 780 774 900 09 9 121 GIGGIGGACAGAAACCITAGACAICGAAGIAATIAITITITITITITATITIGGCIAITICI GACTICCTCGTGGGTTTGATTTCCATTCCTCTGTACATCCCTCACGTGTTTAACTGG reretatatatatacatrictecerearearearearearacetereareareareare 421 GFGCTGGCCTTCTTAGTGATGGCCAATGATTTCTAGTTTCAGAGTCTTGGAAGGA---477 --TGAAGGTAGTGAATGTGAACCTGGATTTTTTTCGGAATGGTACATCCTTGCCATCACA 541 AIGCICTIGGAATICCIGCTICCIGICATCICIGIGGCTIAITICAAIGIACAGATITAC TGGAGCCTGTGGAAGCGTAGGCTCTCAGTAGGTGCCCTAGCCATGCTGGATTCTCCACT 661 ACCICITCCAGTGCTTCAGGACACTTACACAGGGCTGGGGTGGCTTGCAGGACAAGTAAT ATCCTGGTGTCCTTAAGGACTCACATGAACAGCAGTATCACTGCCTTCAAAGTGGGTTCC CTCATGTTTTCCTCAAGAACCAAGATGAATAGCAATACAATTGCTTCCAAAATGGGTTCC TTCTGGCGATCGGAAAGTGCAGCGCTTCGCCAAAGGAGAGTACGCAGAGCTTCTCAGAGGC 1 ATGTCGGAGTCTAACAGTACTGGCATCTTGCCACCAGCTGCTCAGGTCCCCTTGGCATTT 1 Argccagaracrantagcacarcantriarcacrasscacrcgrgrracritagcarrr TTAATGTCTTCATTTGCCTTTGCTATAATGGTAGGCAATGCTGTGGGTCATCTTAGCCTTT AATTTTGGAAGTGGAATCTGCATGTTTTGGCTCATTACTGACTATCTTTTGTGCACCGCA 241 GATITIGGAAAGGAAATCIGIGIATITIGGCICACIACIGACIAICIGTATGTACAGCA TCTTATAGGGCTCAACACACTGGCATCATGAAGATTGTTGCTCAAATGGTGGCTGTTTGG rerraradaaereaacaracredddarerrdaadarrdriaerererdaeddecerrieg 421 ATACTGGCTTTCTTGGTAAATGGCCCGATGATTCTGGCTTCAGATTCTTGGAAGAACAGC 481 ACGAACACAAAAGGACTGTGAGCCTGGCTTTGTTACAGAGTGGTACATCCTCACCATTACA TCATTCTTGGAATTCGTGATCCCAGTCATCTTAGTCGCTTATTTCAACATGAATATTTAT Greterrecaacarergadacaerearreagageragaerarerreaggaarerer rrrargrectragrascrrrrscraraarscrassaarscrrrssrcarrrascrrr Gaps 6 Sequence 1173 BP; 294 A; 245 C; 231 G; 403 T; 0 U; 0 Other; Indels 58.4%; Score 686.6; DB 5; 75.1%; Pred.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           774
                                                                                                                                                                                                                                                                                                                                                                                                                                                                     9
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         9
                    antibodies (Ab). These Ab are used to purify HR by immunoaffinity chromatography, in immunoassay of histamine receptor, to identify cDNA clones that express the receptor, as antagonist to block binding of histamine (for treating any histamine-associated disorder) and to generate anti-idiotypic antibodies. Agonists and antagonists of the HR protein can be used in the treatment of e.g. inflammation, asthma, allergy, atopic dermatitis, stroke, wyocardial infarction, migraine, chronic obstructive pulmonary disease, rheumatoid arthritis, multiple sclerosis, inflammatory bowel disease and psoriasis
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  GACTICITITGIGGGIGIGATCICCATTCCTTTGIACATCCCTCACACGCTGTTCGAATGG

The present sequence encodes a human histamine receptor. The polypeptide is useful for identifying an agonist or antagonist of a mammalian histamine receptor: It is useful as an antigen to elicit the production of antibodies. The histamine receptor polypeptide and polynucleotide are useful in the treatment and management of diseases such as inflammation, asthma, allergy, atopic dermatitis, stroke, myocardial infection, migraine, chronic obstructive pulmonary disease (COPP). Theurathritis, multiple solerosis, inflammatory bowel disease and psoriasis. They are also useful for modulating intracellular second messenger pathway activated through histamine receptors (cyclic-AMP, calcium, incsitol phosphate and mitogen activated protein (MAP) kinase), changes in cellular growth rate, secretion of hormones, receptor-stimulated Ca2+mobilization, mitogenic effects, etc
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      rengianaracanicicercarcacharcarcaracercaechereaangeneng 360
